

ASSESS Consulting Services

Our cybersecurity consultancy services, designed to address your business' most pressing security challenges

Service Overview

All businesses have a different starting position when it comes to cybersecurity. What is consistent is the aim to continually improve. Regardless of your cyber maturity, we have a portfolio of ASSESS cybersecurity consulting services to identify risks and prioritise areas of improvement. Whilst our ethos is automation-led, when there are challenges relating to cyber readiness, management and recovery, we take a human expertise approach.

Capabilities

CloudGuard's ASSESS services cover four key areas, each with distinct objectives. **Assessment** evaluates your security strategy and solution performance through various tests. **Discovery** focuses on understanding business risk exposure and threat landscapes. **Readiness** involves deploying and optimising security tools to improve posture. **CISO Advisory** offers long-term strategic insights. These cybersecurity consulting services will help you to answer the most burning security questions about your business.

Benefits

Cybersecurity consultancy services offer invaluable expertise to protect your business against ever-evolving cyber threats. With specialised knowledge and experience, consultants can identify vulnerabilities, implement robust security measures, and provide ongoing guidance to mitigate risks effectively.

-  Enhance resource allocation for efficient cybersecurity investment
-  Mitigate risks through informed management strategies
-  Drive continual improvement via iterative assessments
-  Maximise cybersecurity investment impact and value
-  Create proactive security measures against evolving threats

ASSESS Portfolio

Our ASSESS cybersecurity consulting services address key security concerns facing your business. We pinpoint vulnerabilities in your security posture, gauge your security maturity against industry standards, and ensure alignment with critical business security needs. By identifying critical vulnerabilities, we provide actionable steps for remediation, enabling you to enhance your cybersecurity strategy.

| Assessment Understanding security maturity | Discovery Understanding exposure risks | Readiness Optimisation of security tools | CISO Advisory Long-term security strategy |
